

Clear Plastic Dividers

Common Designs

These are common sizes with common traits such as an opening for a credit card machine, or slots for cords or papers. We have discrete part numbers for each design iteration.

Made-to-Order

If you don't see a common design option that works, made-to-order dividers are available. These parts are precision cut to a unique shape or size to meet customer specifications. For unique guard shape or size, provide a DXF or CAD file, or a drawing of any kind or simple dimensions. Custom dividers are turned around in 2 business days.

OVER 350 MODELS AVAILABLE!
