

WIRE SHELVING

INDUSTRIAL STRENGTH SHELVING

Why Nexel®?

Maximizing storage can be a daunting prospect for any business owner or manager, and finding the right type of shelving can be confusing and fraught with danger if you choose incorrectly. Luckily for you, Nexel has been designing & producing shelving for a wide assortment of applications and environments, so whether you're installing a new shelving system from scratch or you need to expand what you currently have to accommodate your growth, there's likely a solution for you and your unique needs.

Chrome ESD Wire Shelf Truck

Easy Access Slant Shelf

Nexelon Heavy Duty Starter Unit

This extremely strong shelving features 1" reinforcement square steel tube rails that provide a heavy-duty weight capacity of 1000 to 1600 pounds per shelf. Shelves easily adjust without tools or disassembly, and align on numbered posts at 1" increments for precise shelf placement that won't waste valuable space.

Galvanized Shelf Truck w/Dolly Base

Enclosed Wire Exchange Truck

MEDICAL SUPPLY CARTS & SHELVING

Great medical care is in the details. Help put your patients at ease and instill confidence with offices, exam rooms, and facilities that stay neat, organized, and clean. Choose shelving and supply carts that allow you to safely store diagnostic devices, sterile supplies, and medical instruments & equipment while keeping them easily accessible.

SPACE-TRAC CHROME HIGH DENSITY SHELVING

High density customizable mobile storage systems help double your storage capacity using minimal space. These unique overhead track systems provide instant access to inventory while freeing floor space and increasing the number of shelving units used in a designated area.

OFFICE SOLUTIONS THAT WORK

WORKSTATIONS & STANDS

A successful business, facility, or institution has to keep pace with technology. Nexel developed solutions including wire computer, laptop, LAN workstations & printer stands that provide room for equipment & peripherals while promoting good airflow and prevent dust from settling on shelf surfaces. Depending on your needs, you can choose mobile or stationary models.

Nexel® Poly-Z-Brite Wire Microwave Cart

NEXEL® POLY-Z-BRITE® 4-SHELF WIRE MICROWAVE CART

Ideal for microwaves & small appliances like coffee makers or toasters—this rolling mobile cart is at home in kitchens, breakrooms, cafeterias, & other environments. Shelves are fully adjustable to hold stock and supplies like canned goods, cups, utensils, condiments, and more. Its Poly-Z-Brite® finish is designed to handle extreme temperature & moisture, and is protected by the NEXGard® anti-microbial agent.

BUYING GUIDE

WHY WIRE SHELVING

Not only is wire shelving affordable and often assembled without tools, there are practical reasons to choose it. Wire prevents dust from settling, promotes airflow to inhibit mold & mildew growth, and allows water to penetrate in the event of a fire.

LOCATION OF USE

You should have a clear understanding of where your shelving is going to be installed. The finish & materials must be able to withstand the environment in which it is placed to ensure it won't rot, rust, or otherwise degrade.

WEIGHT CAPACITY

Your shelf should be able to hold its load without sagging or bending—protecting the products and the shelf itself. Consider the items you plan to put on the shelves & their combined weight, then make sure to choose wire shelving that has a weight capacity that exceeds that total weight.

| Finish | Rust & Corrosion | Limited Warranty | Epoxy Powder Coat | Suitable For Wet Use | Suitable For Dry Use | NEXGard® Anti-Microbial Agent | NSF Listed | Recommended Application |
|-----------------|------------------|------------------|-------------------|----------------------|----------------------|-------------------------------|------------|--|

FINISH TYPES

The Nexel® family of wire shelving comes in seven different finishes to suit a variety of environments, including Industrial, Healthcare, Retail, Commercial, Foodservice industries.

NEXGard® is an anti-microbial agent that inhibits bacteria, mold, and mildew growth that can damage the shelving & cause odors. This helps to extend the shelf's service life.

NEXELON®

Limited Lifetime Warranty Against Rust

A proprietary metallic blue powder coat enhanced with NEXGard®, it is designed to withstand extreme wet, hot, or cold environments. It is NSF-listed for use in wet & dry applications. Carries a limited lifetime warranty against rust & corrosion.

CHROME

A Brilliant Finish For the High-Tech Look

A bright chrome finish over a nickel electroplating produces a brilliant high-gloss look that is durable enough for industrial storage applications and attractive enough for use in retail display settings. Carries a limited 1-year warranty when used in dry conditions.

STAINLESS STEEL

Limited Lifetime Warranty Against Rust

Highly rust & corrosion-resistant, the stainless steel is electro-polished to present a bright, smooth, and attractive finish. It can handle extreme moisture & temperature conditions, making it ideal for all storage needs. Carries a limited lifetime warranty against rust & corrosion, and is NSF listed for use in wet & dry applications.

POLY-GREEN®

15 Year Limited Warranty Against Rust

Durable green epoxy powder coat over zinc-chromate electroplating enhanced with NEXGard®. It is designed to withstand extreme temperatures and moisture. Carries a limited 15-year warranty against rust and is NSF-listed for use in wet & dry applications.

POLY-Z-BRITE®

15 Year Limited Warranty Against Rust

Has a clear, durable epoxy powder coat over zinc-chromate electroplating that resembles chrome. It is enhanced with NEXGard® and is designed to withstand extreme temperatures and moisture. Carries a limited 15-year warranty against rust & corrosion, and is NSF-listed for use in wet & dry applications.

SILVER EP

Attractive and Economically Priced

Epoxy powder coat (EP) that has a bright silver finish over a rust-inhibiting undercoat. It can handle both wet & dry conditions, making it ideal for most storage needs. Carries a limited 7-year warranty, and is NSF-listed for use in wet & dry applications.

BLACK EP

Attractive and Economically Priced

Black epoxy powder coat (EP) over a rust-inhibiting undercoat. It can handle both wet & dry conditions, making it ideal for most storage needs. Carries a limited 7-year warranty, and is NSF-listed for use in wet & dry applications.

CUSTOMIZE YOUR SHELVING

UPGRADE & EXPAND YOUR SHELVING

Where you put your shelving and what you need to store is unique to your business and facility, so being able to customize your storage allows you to maximize your shelving investment.
